**CITY OF SEATTLE
ANALYSIS AND DECISION OF THE DIRECTOR
OF THE DEPARTMENT OF PLANNING AND DEVELOPMENT**

Application Number: 3019327
Applicant Name: Bradley Khouri
Address of Proposal: 3012 4th Ave W

SUMMARY OF PROPOSED ACTION

Land Use Application to allow a three story, 2-unit townhouse structure in an environmentally critical area. Existing single family residence to remain. Existing detached garage to be removed. Environmental Review includes future unit lot subdivision.

The following approval is required:

SEPA – Environmental Threshold Determination (SMC Chapter 25.05)

SEPA DETERMINATION

Determination of Non-Significance

- ☒ No mitigating conditions of approval are imposed.
- ☐ Pursuant to SEPA substantive authority provided in SMC 25.06.660, the proposal has been conditioned to mitigate environmental impacts

BACKGROUND INFORMATION

Location: The site is an interior lot located on the east side of 4th Ave W, between W Dravus Street to the north and W Barrett Street to the south. It is located in North Queen Anne.

Zoning: The site is zoned Lowrise 1 (LR1). Sites across the alley to the east are zoned Lowrise 3 (LR3).

Parcel size: 4,826 square feet

Environmental Critical Areas: The site is a designated ECA Potential Slide Area.

Existing Conditions: There is an existing single-family dwelling unit and detached garage on site. The site slopes down approximately 20 feet from 4th Ave W to the alley. Surrounding uses are a mix of single-family, duplexes, and multi-family units.

Proposal Description: The project proposes to remove the existing detached garage and construct a two unit, three story townhouse between the existing dwelling and the alley. Access will be taken off the alley, and 3 parking stalls will be provided.

Public Comment: The public comment period ended on January 11, 2015. DPD received no comment letters.

ANALYSIS – SEPA

The proposal site mapped as an Environmentally Critical Area as a Potential Slide Area. Proposals located in landslide prone areas (i.e. known landslide areas, potential landslide areas, and steep slopes), wetlands, and fish and wildlife habitat conservation areas may require environmental review (SMC 25.05.908), thus this application is not exempt from SEPA review. However, the scope of environmental review of projects within these critical areas is limited to: 1) documenting whether the proposal is consistent with the City's Environmentally Critical Areas (ECA) regulations in SMC 25.09; and 2) Evaluating potentially significant impacts on the critical area resources not adequately addressed in the ECA regulations. This review includes identifying additional mitigation measures needed to protect the ECA in order to achieve consistency with SEPA and other applicable environmental laws.

Environmental review resulting in a Threshold Determination is required pursuant to the Seattle State Environmental Policy Act (SEPA), WAC 197-11, and the Seattle SEPA Ordinance (Seattle Municipal Code Chapter 25.05).

The initial disclosure of the potential impacts from this project was made in the environmental checklist submitted by the applicant on August 28, 2013. The Department of Planning and Development has analyzed and annotated the environmental checklist submitted by the project applicant; reviewed the project plans and any additional information in the file and any pertinent comments which may have been received regarding this proposed action have been considered. The information in the checklist, the supplemental information, and the experience of the lead agency with the review of similar projects form the basis for this analysis and decision. As indicated in the checklist, this action may result in adverse impacts to the environment. However, due to their temporary nature and limited effects, the impacts are not expected to be significant.

City codes and/or ordinances apply to the proposal and will provide mitigation for short and or/long term impacts. Applicable codes may include the following: *Stormwater Code* (SMC 22.800-808); *Grading Code* (SMC 22.170), *Street Use Ordinance* (SMC Title 15), *Seattle*

Building Code; Regulations for Environmentally Critical Areas (SMC 25.09); and Noise Control Ordinance (SMC 25.08).

The SEPA Overview Policy (SMC 25.05.665) clarifies the relationship between codes, policies, and environmental review. Specific policies for each element of the environment, and certain neighborhood plans and other policies explicitly referenced, may serve as the basis for exercising substantive SEPA authority. The SEPA Overview Policy (SMC 25.05.665) states, in part, *“Where City regulations have been adopted to address and environmental impact, it shall be presumed that such regulations are adequate to achieve sufficient mitigation”* subject to some limitations. Under such limitations or circumstances (SMC 25.05.665 D) mitigation can be considered. Thus, a more detailed discussion of some of the impacts is appropriate.

Short-Term Impacts

The following temporary or construction-related impacts are expected: 1) temporary soil erosion; and 2) increased vibration from construction operations and equipment. These impacts are not considered significant because they are temporary and/or minor in scope (SMC 25.05.794).

Earth / Soils

The ECA Ordinance and Director’s Rule (DR) 18-2011 require submission of a soils report to evaluate the site conditions and provide recommendations for safe construction in landslide prone areas. Pursuant to this requirement the applicant submitted a geotechnical engineering study, *Geotechnical Report: Proposed Townhouse 3014 4th Avenue W, Seattle WA*, prepared November 13, 2014 by GeoPAN. The study has been reviewed and approved by DPD’s geotechnical experts, who will require what is needed for the proposed work to proceed without undue risk to the property or to adjacent properties. The existing Grading and Stormwater Codes will sufficiently mitigate adverse impacts to the ECAs. No further SEPA conditioning is warranted (SMC 23.05.665).

Long -term Impacts

Long term or use-related impacts on the environmentally critical area are also anticipated as a result of this proposal, including: increased surface water runoff due to greater site coverage by impervious surfaces; loss of plant and animal habitat. Compliance with applicable codes and ordinances will reduce or eliminate most adverse long-term impacts to the environment. No further SEPA conditioning is warranted (SMC 23.05.665).

DECISION – SEPA

This decision was made after review by the responsible official on behalf of the lead agency of a completed environmental checklist and other information on file with the responsible department. This constitutes the Threshold Determination and form. The intent of this declaration is to satisfy the requirement of the State Environmental Policy Act (RCW 43.21.C), including the requirement to inform the public of agency decisions pursuant to SEPA.

- ☒ Determination of Non-Significance. This proposal has been determined to not have a significant adverse impact upon the environment. An EIS is not required under RCW 43.21.030(2) (c).
- ☐ Determination of Significance. This proposal has or may have a significant adverse impact upon the environment. An EIS is required under RCW 43.21C.030(2)(C).

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21C.030 (2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request.

This DNS is issued after using the Optional DNS process in WAC 197-11-355 and Early review DNS process in SMC 25.05.355. There is no further comment period on the DNS.

CONDITIONS OF APPROVAL

None.

IMPORTANT INFORMATION FOR ISSUANCE OF YOUR MASTER USE PERMIT

Master Use Permit Expiration and Issuance

The appealable land use decision on your Master Use Permit (MUP) application has now been published. At the conclusion of the appeal period, your permit will be considered “approved for issuance”. (If your decision is appealed, your permit will be considered “approved for issuance” on the fourth day following the City Hearing Examiner’s decision.) Projects requiring a Council land use action shall be considered “approved for issuance” following the Council’s decision.

The “approved for issuance” date marks the beginning of the **three year life** of the MUP approval, whether or not there are outstanding corrections to be made or pre-issuance conditions to be met. The permit must be issued by DPD within that three years or it will expire and be cancelled. (SMC 23-76-028) (Projects with a shoreline component have a **two year life**. Additional information regarding the effective date of shoreline permits may be found at 23.60.074.)

All outstanding corrections must be made, any pre-issuance conditions met and all outstanding fees paid before the permit is issued. You will be notified when your permit has issued.

Questions regarding the issuance and expiration of your permit may be addressed to the Public Resource Center at prc@seattle.gov or to our message line at 206-684-8467.
